

Jenkins Pipeline - Addition of Two Numbers (Python + BAT)

Step 1: Python Script (add.py)

```
import sys

def add_numbers(a, b):
    return a + b

if __name__ == "__main__":
    num1 = int(sys.argv[1])
    num2 = int(sys.argv[2])
    result = add_numbers(num1, num2)

    print("=====")
    print("Addition Result")
    print("=====")
    print(f"First Number : {num1}")
    print(f"Second Number: {num2}")
    print(f"Sum          : {result}")
```

Step 2: Jenkins Pipeline Script

```
pipeline {
    agent any

    parameters {
        string(name: 'BRANCH_NAME',
            defaultValue: 'main',
            description: 'Git branch')

        string(name: 'NUM1',
            defaultValue: '10',
            description: 'First Number')

        string(name: 'NUM2',
            defaultValue: '20',
            description: 'Second Number')
    }

    stages {
        stage('Checkout') {
            steps {
                git branch: "${params.BRANCH_NAME}",
                    url: 'https://github.com/Ramlingams/pipeline-parameters.git'
            }
        }

        stage('Addition Build') {
            steps {
                bat "python add.py ${params.NUM1} ${params.NUM2}"
            }
        }
    }
}
```

How to Run

1. Save the pipeline in Jenkins.
2. Click 'Build with Parameters'.
3. Enter NUM1 and NUM2 values.
4. Click Build.
5. Check Console Output to see the addition result.
